

LINES DRAWN ON WATER

We have here
Somewhat strange type of border – line,
Going through the middle of the river

Can anyone draw lines on water?
Can a heart split up into two?

The fish, as ever
Keep going and coming
Hither & thither
Even the tortoises can not recognize
The mid stream border-line

I could never make out
The names of the countries.
From the fish that were caught

I only know the names.
Of those fishing
And helplessly watch
The fish flopping about in anguish
